Professional Experience

Intouch Insight	July 2017 - current

Fullstack Developer

- Produced real time web applications leveraging modern javascript stack (i.e. Node.js, Express.js, React.js/Redux.js and MongoDB)
- Developed highly interactive client side user interface with React.js/Redux, CSS3,
- SASS. Designed and developed optimized scalable RESTful apis with Node.js.

University of Toronto	March 2018 - current

Javascript Bootcamp Instructor (Part Time)

- Guided students to understand and learn object oriented design, functional programing in javascript and ES6
- Increased student engagement in learning coding by developing interactive programing exercises

IBM Streams Analytics	May 2016 - December 2016

Software Engineer (DevOps)

- Developed, improved and maintained continuous integration pipeline with Jenkins
- Produced and maintained Java Maven and Groovy scripts for CI/CD automation
- Developed scripts for infrastructure deployment and maintenance within a TDD environment.
- Produced and improved testing scripts for quality assurance.

IBM Application Security on Cloud	January 2016 - April 2016

Software Developer (Co-op)

- Implemented java REST API endpoints for querying and monitoring SQL and NoSQL database
- Developed micro services with JavaScript (Node.js) for monitoring resources usage for cloud instances
- Illustrated strong communication skills through producing technical documentation, UML workflow and hosting software demo presentation

My Portfolio

- **My Portfolio Website** www.shadid.ca is my online portfolio where I post my latest projects. Repo: github.com/Shadid12/shadid_portfolio
- **Message in a bottle:** A digital social networking service that allows you to connect with a random stranger. link: https://messageinbottle.herokuapp.com/

  Source code: https://github.com/Shadid12/Message_Bottle
- **Genetic Algorithm Simulation:** Developed a self evolving AI bots to find target using GA sim. https://codepen.io/Shadid/pen/KqKmEE
- **Stack Over Flow Contribution:** I am also an active member of stack over flow. My profile: http://stackoverflow.com/users/3422137/shadid

Bachelors of Computer Science (BSc)

University of Ontario Institute of Technology (UOIT)	2014 - 2017

Technical Skills

Languages: Java, JavaScript, Ruby, Python, PHP

CI/CD: Jenkins, Gitlab

Virtualization: Docker, VM-ware

Cloud Services: AWS, Heroku, Azure

Version Control: Git, GitLab

Front end Web: HTML5, CSS3, SASS, Jquery, React.js, Redux, Angular.js

Backend: Node.js, Ruby on Rails, Laravel, REST API

Databases: SQL, PostgreSQL, MongoDB

Concepts: Object Oriented Design, Test Driven Development, Continuous Integration

OS: Linux/Unix, Mac, Windows

Extracurricular

- Hosted Programming seminars as an Executive member of IEEE (Institute of Electrical Electronics Engineers) student branch
- Given talk on Ruby on Rails as a senior member of computer science club.
